

MILITARY TRAINING SOLUTIONS

Stay prepared with training that changes when the very nature of warfare is facing major revisions.

From near-peer conflict and multi-domain operations to urban warfare and protecting vulnerable installations, InVeris provides integrated virtual and live-fire training to meet tomorrow's challenges.

There's a long-time saying that you should "train like you fight." But what happens to training when the very nature of warfare is facing major revision?

Here's how InVeris Training Solutions readies you for the next-generation battlefield:

Innovative thinking to prepare you for **EMERGING THREATS.**

To keep pace with fast-changing threats, our staff is collaborating with advanced programs that has revolutionized military training. We know that our present pioneering work with military small arms training is only the threshold of changes mandated by future security concerns.

**ADVANCED PROGRAMS
THAT REVOLUTIONIZE
MILITARY TRAINING**

Protect your troops and the countries they defend with **VIRTUAL REALITY + RELEVANT SCENARIOS**

Military police form the strategic first line to protect installations, bases and other defense areas. InVeris has developed a fully immersive virtual reality system to train these critical personnel with their combined military and law enforcement duties: from response to terrorist attacks to handling continuum of force with domestic criminal encounters. The **InVeris VR-DT** (Virtual Reality – Decision & Tactics) offers a robust platform, containing vivid 3D courseware.

For military, InVeris creates all scenario content for the **VR-DT**, allowing you to author new scenarios for your mission. InVeris' years of experience developing military training translates into mastering unforgettable real-world conflicts.

**ALWAYS HAVE THE
LATEST TRAINING PLATFORM
FOR REAL-WORLD SITUATIONS**

Train your troops with 35 years of proven **FATS**[®] virtual innovation.

The **InVeris VR-DT** evolved out of our **FATS**[®] line of virtual systems, each geared to different training situations. Our **FATS**[®] simulators can help trainees learn critical combat skills simultaneously, including: marksmanship, heavy weapons, collective and de-escalation skills.

For example, our **FATS**[®] **100MIL** simulation training system puts trainees in the action, facing realistic pressures while maintaining situational awareness. The system uses the same high-fidelity ballistic engine validated by the U.S. Army, U.S. Marine Corps and international military customers, complemented by our wireless **BlueFire**[®] simulated weapons, with over 300 variants available.

FATS[®] FOCUSES ON
CRITICAL
COMBAT SKILLS

Prepare for urban warfare with both virtual and live fire using the InVeris **SHOTT™ House**.

Conflict in urban areas calls for new approaches to critical skills training, fully integrating live-fire and virtual systems. The InVeris **Shoot House Optimized for Tactical Training (SHOTT™)** provides this kind of tactical environment. In addition to InVeris' shooting range equipment, you can install a **FATS®** virtual training system in the **SHOTT™ House** for a comprehensive solution for marksmanship, sustainment and judgmental training. Trainees can practice necessary skills such as

forced entry, room navigation, dynamic and covert clearing, team tactics and judgmental use of force in one dynamic facility. The **SHOTT™ House** even allows users to practice securing a structure via live or virtual weapons. In addition, your own video scenarios projected on the walls create a flexible scenario for rapid customization based on your mission.

SHOTT™ HOUSE
offers either **LIVE-FIRE**
OR *VIRTUAL SCENARIOS*

Win in theater through state-of-the-art, live-fire training.

Live-fire training helps soldiers accomplish their mission when boots are on the ground. Our military live-fire range equipment has operated on global installations for decades, regularly withstanding the harshest range conditions. We offer total shooting range solutions, including a wide variety of static and moving targets representing infantry and armor for every type of training.

ADVANCED TARGET SYSTEMS.

Perceive and respond to realistic threats with calmness and precision. Fast-moving enemies. Friend-or-foe discrimination. Split-second decision-making skills. Cover and concealment. Low-light situations. Turning targets. Our spectrum of target technologies make that happen:

A WIDE VARIETY OF TARGETS
IN THE HARSHEST OF CONDITIONS
FOR DECADES

Rely on our Turnkey Range Solutions: One **Vendor**. One **Contract**. One **Stop**.

InVeris offers military forces the world's only complete live-fire training solution.

InVeris provides your organization with a fully equipped range in as little as **120 days**, start to finish, from understanding your requirements to welcoming trainees. That's why we have more than **80,000 targets** fielded on **122 military bases** globally. Our indoor and outdoor ranges feature **advanced targetry**, **traps** and **control systems**, customized to your training needs.

We build every range for **longevity** and **ruggedness** to stand up to day-in, day-out use for years to come.

RUGGED
LONG LASTING
GLOBAL

Because your mission can't afford downtime, support your training with 24/7 global customer service.

InVeris Training Solutions combines an agile approach with unmatched expertise to deliver cutting-edge, first-rate training solutions that keep military forces prepared and ready to serve — Because Seconds Matter™.

We remain the global leader in integrated live-fire and virtual weapons training solutions. Through our legacy technologies, FATS® and Caswell, InVeris Training Solutions has fielded 15,500 live-fire ranges and 7,500 virtual systems globally during our 95-year history. InVeris is your one-stop partner for complete combat readiness.
