

QUIKTURN™ 360 PORTABLE

Turning Target System

The QuikTurn™ 360 Portable Turning Target System provides comprehensive live fire training capability when and where you want to train. No longer tethered by power cords, the adjustable base, power pack, Wi-Fi radio, multiple available targets and target brackets set up, break down, and go anywhere with ease.

Designed for random and concealed placements, throughout an indoor or outdoor live-fire range and communicating with the RangeMaster™ 9K/10K software and ruggedized wireless tablet controller out to 2000 meters, the QuikTurn™ 360 Portable Target System can be configured to fully enhance training.

The self-contained system allows the QuikTurn™ 360 Portable Target System to be used in a wide variety of environments and training applications.

- Quickly set up and taken down, it can be used on an existing range and put away when not in use.
- Placed in real world environments, it can be used for mission rehearsal, sim training, or moved around inside live fire shoot houses to further enhance training.

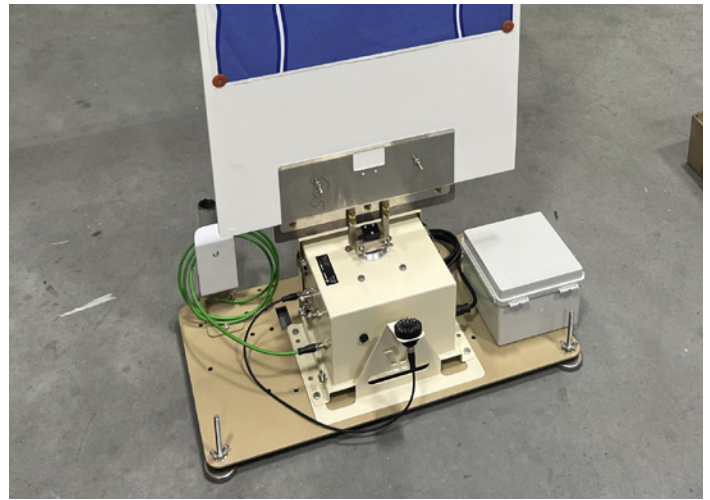

ADVANTAGES OF INVERIS' QUIKTURN™ 360 PORTABLE TARGET SYSTEM:

- Dedicated range space is not required to conduct training or complete qualifications
- Eliminates maintenance and downtime associated with pneumatic systems.
- Quick and easy setup and take down

Stores away securely when not in use to avoid theft or damage due to severe weather (e.g., flooding).

InVeris' QuikTurn™ 360 Portable Target System provides an impressive array of features, including:

- 90° expose/conceal time in less than .5 seconds
- 360° target presentations, advanced target identification of threat/non-threat target engagements

- All targets can be controlled collectively or individually
- Red, blue, and white LED lights
 - Low-light or hostile fire mode – white
 - Distraction lighting – red, blue, white
- 600 round per minute hit sensing with optional hit-sensor and molded targets for both friend & foe engagements

- Supports multiple target heads and existing customer target frames (e.g., 1"x2" wood stakes, molded 3D targets)
- Qualification and advanced training scenarios can be authored, stored, and accessed any time using the RangeMaster™ 9K/10K software and wireless tablet.

TECHNICAL SPECIFICATIONS

Hit Sensing	Up to 600 hits/minute (optional)
Movement and Hit Modes	Expose, conceal, 15° and 90° rotation up to 360°
LED Lights	Red, blue and white
90° Expose/Conceal Time	Less than .5 seconds
360° Turn Time	Less than 1 second
Target Size	Holds multiple target types
Max Target Weight	10 pounds (4.5kg)
Weight of Unit	30 lbs. (13.6 kg)
Communications	Wi-Fi - Out to 2,000 meters (1.24 mi)
Actuator Enclosure Dim	8.25" X 13.5" X 9"
Power Supply	DC Power, rechargeable 20 VDC lithium battery. Solar charging available
Actuations	6500+/charge/5AH battery
