

# fats VR VIRTUAL REALITY Training System

**Bringing the power of proven experience, immersive scenarios, and realistic weapons to a 360° virtual training environment.**

InVeris' **fats® VR** is an advanced training solution that uses virtual reality (VR) for critical, real-world preparation for de-escalation of force situations. **fats® VR** provides law enforcement agencies, private security firms, and military security forces cutting-edge VR technology to rapidly improve trainees' communication skills, decision-making ability, adherence to policies and procedures, and situational awareness.

Utilizing top-of-the-line VR headsets with impressive 360-degree capabilities and weapons tracking, officers train in fully immersive environments that put them in the action. The ability to perform any scenario and interact with a variety of environments and characters is enhanced with **fats® VR**. Additionally, the system is available 24/7 to give trainees as many training repetitions as they need, and then more.

Depending on the trainee's actions, the instructor can dynamically escalate or de-escalate the scenario, and review their decision-making skills from any angle during after action review.

These dynamic training environments and endless branching options increase the trainee's psychological immersion and focus when dealing with the situation at hand. This leads to significantly stronger knowledge retention, so that officers can respond.

**Fully adjustable environments allow instructors to create highly realistic and infinitely dynamic training scenarios.**

## MAJOR FEATURES

- Portable system – the **fats® VR** system is completely portable. A two-trainee system with standard set of weapon simulators will fit in a single hand transportable case.
- Easy setup – the system uses no external tracking infrastructure. The system can be unpacked, setup and ready to train in a matter of minutes.
- Can support two trainees now and will expand to four or more trainees soon.
- Full duty belt of weapons and tools as per customer requests.
- Recoiling weapons – we provide realistic recoiling Pistol and Rifle simulators.
- Scalable training area. Can train in small rooms or over several thousand square feet.
- Intuitive instructor UI – the user interface is designed for the best possible user experience for the instructors.
- High Quality Simulation – The quality of simulation in **fats® VR** is even better than our previous product. The system can simulate realistic emotional expressions on the simulated characters.
- An Expanding library of suspect verbiage and actions to support various conversations and officer commands.
- An Expanding library of suspect and bystander avatars, with variations in gender, ethnicity, and clothing.
- An expanding library of high-quality environments where instructors can decide to train in daytime or nighttime and adjust suspect/bystander starting locations.
- An Expanding library of drag-and-drop props (e.g. contraband, weapons).
- Software updates to add more training courseware, virtual assets, and new features.
- Rich after action reviews with multiple viewpoints and metrics such as shot trajectory.
- Nuisance generator to create realistic background noises and visuals (e.g. barking dog, shots fired, yelling).
- Easily create, edit, and save custom scenarios.
- Practice shooting range for trainees to practice weapon deployment on targets and training dummies.
- Haptic feedback vest\* allows trainees to feel physical sensations when hit by force during a training scenario.
- Heart Rate Monitors\* allow for the instructor to identify when a trainee's pulse is escalating during training scenarios.
- Built with the Instructor quality-of-life in mind, including pinnable actions to allow for quick, dynamic changes during a scenarios.

**fats® VR is highly interactable and allows trainees use their hands for actions from opening doors to handcuffing suspects.**

## WEAPONS SUPPORTED

We support military weapons and equipment, with support for more lethal and less-lethal weapons coming soon

## ENVIRONMENTS

**fats® VR** constantly releases new environments to adapt to evolving needs. Instructors can easily build customized scenarios using any environment to train based on their policies and procedures. These scenarios can then be conveniently saved to the library for future use. The following are the examples of environments that will be available.

- Alleyway
- Backyard
- Bank
- Base Housing
- Bridge
- Construction Site
- Dive Bar
- Flight Line
- Gas Station
- Grocery Store
- Holding Cell
- Hospital Roof
- Jail Cafeteria
- Military Base
- Neighborhood
- Office
- Parking Lot
- Police Station
- Restaurant
- Rural House
- School Hallway
- Suburban Park
